

# Data Migration

Data migration procedures must be followed depending on the application you have and the release you are coming from.

Issue	Workaround
<p>Installation of the <b>ProductPerformanceData</b> package in R2021x GA fails when it is upgraded from a set of releases starting from 19x FD06 (FP1947) to 19x FD12 (FP2045).</p> <p>The media concerned by the above scenario are:</p> <ul style="list-style-type: none"><li>• DELMIAMfgItemsStructurePlanner (DELMIA Manufacturing Items Engineer: Manufacturing Items Management)</li><li>• DELMIAManufacturingAssetsDefinition (DELMIA Manufacturing Process Engineer: Process Management)</li></ul>	<p>The following MQL command should be executed manually before installing R2021x GA to avoid installation failure: <code>modify package ProductPerformanceData property version value R421.HF5 ;</code></p>
